

Website Coordinator Report for the Spring Assembly

Normally, for an Assembly Coordinator Report, I would compose a list of projects and improvements completed. There would a description of completed projects, a list of items that we are developing, and a list of things we hope to get to in the future. Those are all appropriate items to mention, but I often refer to those type of items in the monthly bulletin messages, so, I thought I'd change that up for this spring report. I am wondering what you, our fellow Al-Anon members want your website to provide our membership. We have a wonderful group of talented volunteers that are ready and willing to do whatever we can to provide our Area with the website our membership wants. Are we meeting your needs and more importantly, what can we do to exceed them? Has the technological push that spawned from the pandemic left some of us behind? What do we need to do to help them catch up? How can we better help you find the information you need to partake of service to our wonderful program?

Your input and response to these types of questions are vital to guiding us to making your website what you want it to be. We are better off when we provide our membership with what they need. This is my open invitation to ask you to give us a buzz at the feedback@alanonma.org email address. I commit to you that your input will appear on our agenda to work on in the upcoming months.

In Service,

Dave B
Website Coordinator
