

## **Website Coordinator Report – Spring Assembly 2026**

The Website team is continuing its work on our website redesign project. Our plan is to update the appearance, contemporize it, make it more user friendly, and easier to find information. We are thinking of how best to present information on the site. Our team has been working on this project for a while and has reached the point where we need some help to bring the redesign to completion. We are in the process of seeking vendors to work with our volunteer team to support the group in finalizing this task. I will be providing additional updates as we progress through this process.
